## HONOLULU AWAITS CHEMIST'S REPORT

Strychnine Cause of Mrs. Stanford's Death.

DRUG IN WOMAN'S BODY

California Police Busy Canvassing Characters of Employes in State.

HONOLULU, March 3.-The police certain that Mrs. Stanford was the victim of poisoning, are awaiting the re-port of R. A. Duncan, a government on the contents of the bottle supposed to have contained blearbonate

High Sheriff Henry sent this cable dis patch to Acting Chief of Police Spillane, of San Francisco:

"The Stanford bottle of bicarbonate of soda contained 43 drams 662 grains of strychnine. An examination of the or-gans is now under way."

A medical expert said: "Six hundred and sixty-two grains of strychnine easily would kill 662 persons. The maximum dose administered is only one-fifteenth of a grain, while the average is one-fortieth of a grain." The organs of the dead woman were

removed at the autopsy for chemical analysis. The coroner's inquest is held over for the reports of the chemists.

### Dr. Duncan Cautions.

"From my investigation," said Dr. buncan, "I found sufficient to warrant the belief that there was strychnine in the bottle labeled 'bicarbonate of soda. I will not say at this time positively that strychnine was in the powder, but I feel certain of it.

"I have asked that another chemist be called in consultation and expect to make a report to the high sheriff on the contents of this bottle.

The various organs have also been taken for analysis and their appearance indicates a poor condition of health Miss Bertha Berner, private secretary for Mrs. Stanford, is positive her mis-

tress was poisoned.
"Yes," she said, "I believe Mrs. Stanford was poisoned. She said so repeat edly while we were working over es before she died. She exclaimed almos as soon as I entered her room, 'Oh, Bertha, I believe I have been pois-oned.' PRANCISCO, March 3.—The police of this city firmly believe that Mrs. Stanford was murdered, and will bend oned."

#### Asked for Stomach Pump.

When the doctor came she told him to get a stomach pump, as she believed she had been poisoned. He said she must be mistaken, but she repeated it, and certainly believed she had been poisoned. "For some reason she kept that bottle.

My mind is not clear as to the bottle, but I am under the impression that as fast as its contents were used by Mrs. Stanford she either sent it out to have it refilled at a druggist's or got powder in quantity to have the bottle filled at

a steamer trunk by Miss May Hunt,
Mrs. Stanford's maid. It was about onethird full when found on the night of
the tragedy. Miss Hunt does not remember the quantity it contained when
she put it in the trunk. Neither Mrs.
Stanford nor Miss Berner was present
when the trunk was packed.

The police are positive the medicine in
the bottle was not purchased in Honothe control of the police are reasons for believing that
Miss Berner herself has a good idea of
who committed or might have committed the crime.

The police are tracing the relations
between Albert Beverley, the butler, who
was discharged several months ago, and
Elizabeth Richmond, formerly Mrs.
Stanford's maid.

SAN FRANCISCO, March 3.-The pothe crime.

Acting Chief of Police John Spillane has started a search in San Francisco for the poisoner. The receipt of a cable message from the sheriff of Honolulu that the supposed medicine taken by the lamented woman was charged with strychnine impelled the acting chief to It is the belief of the San Francisco police that the blcarbonate of soda and the strychnine were purchased in this city and secretly dropped into the sup-posedly refilled bottle by a person con-

This Important Organ.

Winter is a little more than half over, and the results of its hearty food are shown in the variable appetite, nausea, gnawing at the pit of the stomach, heartburn, sallow skin, furred tongue, headache, backache, and sleeplessness. The stomach has been overworked, the nervous system is unstrung, the blood is in bad condition, the digestive organs are tired out.

It is at this season of the year that Mi-o-na, the only remedy known that gives strength to the stomach and digestive organs, is of especial value.

Mi-o-na is not a hit-or-miss cure, but is an unusual combination of remedies that makes it infallible in restoring alth to the stomach and digestive yestem. with a population of 400)—and a general laugh greeted the sally.

An hour was lost in registering the great crowd at the National, which will be their headquarters while here, and assigning them rooms. As soon as that formality was over the piainsmen, solicitous as to the welfare of their ponies after the tedious nine days' journey, hurried en masse to the Louisiana avenue livery stable where the animals are stalled.

But another interruption occurred. One of the cowboys spied a stand against the curb, with a pretty girl presiding. Diminutive loving cups of a gaudy pattern, which by a stretch of the imagination might be taken for souvenirs of Washington, were on sale, and the cowpuncher who discovered the cups—and the girl—dragged his companions to the stand by main force. Until the stock was exhausted each victim was separated from fifty cents.
